Six Quick Hints for Success on the TOEFL®

- 1. Try to understand a reading or lecture as a whole. Unlike earlier versions of the TOEFL, the new version tests whether you can see how ideas interact in a longer reading.
- Take notes. Especially in the listening section, you will need notes
 to remember what you have heard. Note-taking will also help you
 concentrate. You can practice by taking notes of news stories, documentaries, or lectures.
- Study grammar in context, not by itself. Unlike earlier versions
 of the TOEFL, the new version has no grammar section. Your
 knowledge of grammar is useful in helping you understand the
 readings and lectures, not in answering grammar-specific questions.
- 4. Practice writing essays that express your opinion on a topic. The writing section of the 2005 TOEFL includes questions asking for your opinion on various daily topics. These are timed. Practice writing under a time limit, shaping your thoughts into a well-rounded essay.
- 5. Build up your academic vocabulary. Your ability to comprehend reading passages rests largely on your academic vocabulary. Build your vocabulary by reading, making flash cards, and writing sentences using new words in context. A strong vocabulary will help you not only in your reading comprehension, but also in listening, writing, and speaking.
- 6. Commit your attention to the test. Some of the topics covered in the test may not actually interest you. Still, your focused energy will improve your test score. Agree with yourself not to think about other topics during the test. Force yourself to keep your attention on the tested material.

TOEFL Success Read the passa have learned. Answer the questions	

In countries like Niger and Mauritania, the *cultivation* of land has changed little in the past several centuries. Additionally, these countries' mono-modal rainfall pattern brings *precipitation* for only three months during the year. **As a result,** food production doesn't nearly meet demand.

Bonus Structure— As a result means "therefore," "for this reason." 6 Nature

Several agencies and organizations have *intensified* their efforts to increase the productivity of land in these countries. They have introduced new strains of seed, improved *irrigation* techniques, and introduced new methods of *fertilization* and soil management. With ample sunlight for *photosynthesis* and modern *irrigation* techniques, sustainable farming techniques should allow farmers to boost *aggregate* production in order to meet demand.

Still, crop revitalization faces an unexpected <u>adversary</u>: institutional incompetence. Where crop specialists have convinced individual farmers to *abandon* old farming techniques in place of new, <u>they</u> can't readily *obtain* the governmental cooperation they need. The biggest hurdles are political corruption, incompetence, and the absence of a marketing infrastructure.

Nature Nature

TOEFL Success Read the passage to review the vocabulary you have learned. Answer the questions that follow.

Nature challenges humans in many ways, through disease, weather, and famine. For those living along the coast, one unusual phenomenon capable of catastrophic destruction is the tsunami (pronounced "tsoo-NAH-mee"). A tsunami is a series of waves generated in a body of water by an impulsive disturbance. Earthquakes, landslides, volcanic eruptions, explosions, and even the impact of meteorites can generate tsunamis. Starting at sea, a tsunami slowly approaches land, growing in height and losing energy through bottom friction and turbulence. Still, just like any other water waves, tsunamis unleash tremendous energy as they plunge onto the shore. They have great erosion potential, stripping beaches of sand, undermining trees, and flooding hundreds of meters inland. They can easily crush cars, homes, vegetation, and anything they collide with. To minimize the devastation of a tsunami, scientists are constantly trying

Bonus Structure— Despite this means "even so; regardless." to *anticipate* them more accurately and more quickly. Because many factors come together to produce a life-threatening tsunami, foreseeing them is not easy. **Despite this,** researchers in meteorology *persevere* in studying and predicting tsunami behavior.

- 1. Which sentence best expresses the essential information of this passage?
 - a. Tsunamis could become a new source of usable energy in the next hundred years.
 - b. Tsunamis do more damage to the land than flooding.
 - c. Tsunamis can have an especially catastrophic impact on coastal communities.
 - d. Scientists can predict and track tsunamis with a fair degree of accuracy, reducing their potential impact.
- 2. In the first sentence, why does the author mention weather?
 - a. because tsunamis are caused by bad weather
 - b. because tsunamis are more destructive than weather phenomena
 - c. as an example of a destructive natural force
 - d. as an introduction to the topic of coastal storms

Definitions and Samples

1. adapt *v*. To adjust to the circumstances; to make suitable Dinosaurs could not **adapt** to the warmer temperatures.

The teacher adapted the exercises for his more advanced students.

Usage tips Adapt is often followed by to.

Parts of speech adaptation n, adapter n, adaptable adj

diverse n. Various; showing a lot of differences within a group
 India is one of the most linguistically diverse countries in the world.
 Usage tips An -ly adverb (e.g., linguistically) often comes before diverse.

Parts of speech diversify v, diversity n, diversification n

3. evolve v. To develop; to come forth

Modern-day sharks **evolved** from their ancestor *Eryops*, which lived more than 200 million years ago.

Usage tips Evolve is often followed by into or from. Parts of speech evolution n, evolutionist n

4. feature *n*. Part, characteristic

The best **feature** of this car is its heated seats.

Usage tips Feature is often followed by of.

Parts of speech feature v

5. generation n. A group of people born at about the same time

As older managers retired, a new **generation** of leaders took control of the company.

Usage tips Before generation, an adjective like new, next, earlier, or older is common. Generation is often followed by of.

Parts of speech generational adj

6. inherent *adj*. Naturally characteristic; always found within something, because it's a basic part of that thing

No job can be interesting all the time. Boredom is **inherent** in any kind of work.

Usage tips Inherent is often followed by in.

Parts of speech inherently adv

7. migration n. Movement from one place to another by a group of people or animals

The **migration** of farm workers from one state to the next depends primarily on the harvest.

Usage tips Migration is often followed by to or from.

Parts of speech migrate v, migrant n, migratory adj

8. physical *adj*. Related to the body; related to materials that can be seen or felt

Because of the shape of its throat, an ape does not have the **physical** ability to speak.

Nature Nature

The mountains form a **physical** barrier between the west and the east.

Usage tips Physical usually comes before the noun it describes.

Parts of speech physically adv

9. process n. A series of steps leading to a result

To get a good job, most people go through a long **process** of letterwriting and interviews.

Usage tips Process is often followed by of plus the -ing form of a verb.

Parts of speech proceed v, process v

10. survive v. To continue living (despite some danger or illness)

After getting lost in the mountains, Gordon **survived** by eating wild plants and catching fish.

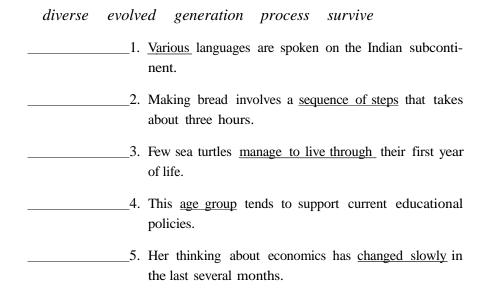

Usage tips Survive is often followed by a phrase with by.

Parts of speech survivor n, survival n

TOEFL Prep I Find the word or phrase that is closest in meaning to the opposite of each word in the left-hand column. Write the letter in the blank.

______ 1. physical (a) not an integral part
2. migration (b) stay the same
3. adapt (c) die
4. inherent (d) staying in one place
5. survive (e) mental

TOEFL Prep II Choose the word from the list that is closest in meaning to the underlined part of each sentence. Write it in the blank.

TOEFL Success Read the passage to review the vocabulary you have learned. Answer the questions that follow.

The *migration* from Asia to North America across the Bering Strait (perhaps by land bridge) was a <u>monumental</u> event in human history. The *process* of overspreading the Americas took more than 1,000 years, or 30 *generations*. This might seem to confirm common sense—that slow travel

was *inherent* in any great migration without wheeled vehicles across unknown terrain. **Further thought** shows that this process was remarkably fast—about 10 north-south miles per year, on average. The Americas were populated at an astounding pace, when one considers the *physical* limits of the human body and the physical

Bonus Structure— Further thought means "looking deeper; thinking more."

features of the American continents. Legs of humans can move only so fast under the best of circumstances, and they work even slower over mountain passes or deserts. Populations spread through the *diverse* regions of the Americas (grasslands, eastern forests, coastal swamps) and needed to *adapt* to their new environments. The migrants' lifestyle had *evolved* over the years to that of professional nomads ensuring that they would find the resources needed to *survive*.

16 Nature

- 1. Which sentence best expresses the essential information in this passage?
 - a. Human migration across the Bering Strait was remarkably slow.
 - b. Physical limitations made migration across the Bering Strait almost impossible.
 - c. Humans readily adapted to life in the Bering Strait.
 - d. The migration through the Americas was surprisingly fast.
- 2. In this passage, the word monumental is closest in meaning to
 - a. disastrous
 - b. evolving
 - c. important
 - d. physical

Target Words

 constraint
 emission
 contamination
 extinction 6. emission 3. deplete 8. reservoir 9. shrink 4. dispose of 5. elementally 10. stable

Definitions and Samples

1. constraint n. Something that restricts thought or action The constraints of military life kept Eileen from seeing Private Morris more than once a month.

Parts of speech constrain v

2. contamination n. Being made less clean by a germ or hazardous substance

The contamination in the river came from the factory located just upstream.

Parts of speech contaminate v, contaminant n

3. deplete v. To greatly decrease the supply of a resource or material The prolonged war depleted the country's national treasury. Parts of speech depletion n

Nature Nature

4. dispose of v. To throw away; to get rid of; to kill

She **disposed of** her unwanted possessions before moving.

The tyrant cruelly **disposed of** all his enemies.

Usage tips Dispose of should be learned as a unit. In this meaning, dispose does not occur without of.

Parts of speech disposal n, disposable adj

5. elementally *adv*. In terms of elements; basically

Elementally, coal and diamonds are the same.

Parts of speech element n, elemental adj

6. emission *n*. Sending out from a small space into the general environment; a substance discharged into the air

The Environmental Protection Agency regulates the **emission** of pollutants into the air.

Usage tips Emission is usually followed by an of phrase.

Parts of speech emit v

7. extinction n. Complete disappearance; the end of existence

Human beings have caused the extinction of many other species.

Usage tips Extinction implies an absolute end; an extinct thing cannot be brought back into existence.

Parts of speech extinct adj

8. reservoir *n*. A place where a liquid is collected and stored

Cult members threatened to poison the town's water **reservoir**.

Parts of speech reserve v

9. shrink v. To become reduced in size, amount, or value
If you dry your clothing on the "high heat" setting, they may shrink.
Parts of speech shrinkage n, shrinkable adj

10. stable *adj*. Firm and dependable; showing little change

He fell because the ladder wasn't stable.

Parts of speech stability n, stably adv

TOEFL Prep I Find the word that is closest in meaning to the opposite of each word in the left-hand column. Write the letter in the blank.

 1. stable	(a)	keep
 2. contamination	(b)	expand
 3. extinct	(c)	unsteady
 4. dispose of	(d)	existing
5. shrink	(e)	purity

TOEFL Prep II Circle the word that best completes each sentence.

- 1. The (constraints / contamination) of being in prison made her hate society even more.
- 2. A recognition that the Earth is round was one of the (elemental / shrunken) advances in thought during the time period.
- 3. Mother Teresa, who helped the poorest of the poor, had a great (disposal / reservoir) of love within her spirit.
- 4. Automobiles are responsible for some (emissions / extinction) of greenhouse gases.
- 5. By the end of the storm, the hikers had (depleted / reserved) even their emergency stores.

TOEFL Success Read the passage to review the vocabulary you have learned. Answer the question that follows.

Human consumption of fossil fuels is expected to fully *deplete* the Earth's crude oil reserves by the year 2060. As underground *reservoirs* of oil continue to *shrink*, we have no choice but to find alternatives. **One promising source,** with much cleaner *emissions*, is called bio-diesel. Bio-

Bonus Structure— One promising source signals the point of this paragraph. Nature Nature

diesel is often made from soybean oil, although it can be made from any vegetable oil that is not *elementally* different from soy. Bio-diesel can even be made from used cooking oils that homes or restaurants would otherwise *dispose of.* Bio-diesel can be used without *constraint* in any vehicle that runs on diesel—no modifications are needed. Presently, diesel engines can take up to 20 percent soy in their soy-diesel blend. As the need for bio-diesel increases and the technology improves, we may soon witness the *extinction* of the fossil-fueled vehicle. This is good news for the planet, as bio-diesel is a more *stable* source of energy than petroleum, and it reduces *contamination* of our air and water.

An introductory sentence for a brief summary of the passage is provided below. Complete the summary by selecting the three answer choices that express the most important ideas in the passage. In each blank, write the letter of one of your choices.

Bio-diesel is a promising alternative to fossil fuels.

•

•

- a. Humans have shown little self-restraint in their consumption of fossil fuels.
- b. Underground reservoirs of oil will soon be depleted.
- c. Bio-diesel burns cleaner than fossil fuels.
- d. Bio-diesel comes from a more stable source than petroleum.
- e. Restaurants can save disposal fees on used cooking oil.

4. exponentially adv. At a very fast rate

In Turkey, the value of the lira has decreased **exponentially** in the last several decades.

Usage tips Exponentially is taken from mathematics, where an exponent is a number indicating how many times something is multiplied by itself. For example, 4^3 contains the exponent "3," indicating $4 \times 4 \times 4$.

Parts of speech exponent n, exponential adj

5. infinitesimal *adj*. Immeasurably small

The number of contaminants in the water was **infinitesimal**, so the water was safe to drink.

Parts of speech infinitesimally adv

6. maximize v. To increase or make as great as possible

A coach helps each athlete **maximize** his or her potential.

Parts of speech maximum n, maximum adj

7. parallel adj. Being an equal distance apart everywhere

The street where I live runs parallel to the main road through town.

Usage tips Parallel is often followed by to.

Parts of speech parallel n, parallel adv

8. proportion n. A part in relation to the whole

The average employee spends a large **proportion** of each workday answering e-mails.

Usage tips Proportion is often followed by of.

Parts of speech proportionate adj, proportionally adv

9. rate *n*. The cost per unit of a good or service; the motion or change that happens in a certain time.

Postal rates in Japan are among the highest in the world.

Time is, **as we all know**, money. Such valuation of time leads people to extreme efforts to *maximize* their use of time. Some people obsess over

Bonus Structure— As we all know is a writer's device for appealing to common knowledge. knowing the exact time. They buy clocks and watches that automatically *adjust* themselves over the Internet or by radio waves. These measurements allow them *infinitesimal* accuracy in dealing with time. Regardless of how one tracks time, most people share a common goal: They want to use time effectively. Since about 1982, this efficiency has increased

exponentially each year, thanks to computers and their ability to multitask. In multitasking, a computer executes several different tasks in parallel. Rather than being set arbitrarily, each task is given a priority in the computer's operating system, and time is spent in proportion to the priority of the task. The computer executes different <u>sequences</u> of tasks at different clock cycles, thereby increasing the *rate* of output from a process.

- 1. Why does the author mention computer multitasking in this article?

Organic products from ancient life are an *integral* part of the Earth's resources, offering scientists a more *accurate* picture of ancient life-forms. One key to ancient life comes in the form of petrified matter. Petrifaction is a process that slowly turns the remains of a living object into stone. In this process, minerals *seep* into a mass of organic matter. After the organic matter has been replaced, a mineral version of the living object is left. Petrifaction often occurs in trees that are found *adjacent* to rivers, floodable areas, and volcanoes, which provide the mud or ash that initially covers the organic matter. Some pieces of petrified wood *retain* the original

Bonus Structure— In this context, today means "at present; at this time in history." cellular *structure* of the wood and the grain can be easily seen. **Today**, it is *feasible* to petrify wood in a simple laboratory process.

Fossils are another way that ancient life is preserved. Most fossils include an animal's hard parts, such as teeth and bones. One type of fossil, called a trace fossil, may

also include eggs, tooth marks, contents of the *guts*, and fossil excrement. Some products from ancient life offer us more than scientific knowledge. One such product is coal, a solid fuel of plant origin. It develops over millions of years, during which swamp vegetation is <u>submerged in</u> water, depleted of oxygen, and covered by layers and layers of sand and mud. These *overlapping* layers settle with the Earth's movements and are *compressed* over time.

- 1. Which sentence best expresses the essential information of this passage?
 - a. Preserved life-forms, including petrified matter and fossils, teach us about ancient life.
 - b. The primary function for preserved life-forms is scientific discovery.
 - c. Scientists try to replicate natural processes that preserve ancient life-forms.

As dependence on computers increases, so does the need for technical support. From installation of software to detection of viruses, computers require constant vigilance. Most larger companies find it most expeditious to maintain in-house computer staff. Many smaller companies, however, can't fund their own full-time, in-house technical help. Instead, many of them assign the task of computer maintenance to a current employee who may not have any formal training. Rather, these "computer buffs" have derived their skills through practice and self-training. These selfappointed tech specialists, however, often cannot solve bigger problems. What's more, they may see their office relations corrode when they are swamped with basic user questions that they simply don't have time to address. For these reasons, many small companies choose to employ a freelance technical assistant who circulates among clients on an as-needed basis. With their professional training, these consultants may propose innovative solutions to users' unique needs, which could vary from tracking inventory to simulating mechanized processes. They can implement new programs, train personnel, and escape the workplace before being asked,"How can I cut this file and paste it somewhere else?"

- 1. Which sentence best expresses the essential information of this passage?
 - a. Larger companies are better off using freelance technical consultants.
 - b. Computer maintenance and troubleshooting cuts into employee productivity.
 - c. Self-trained technical support personnel are often as effective as trained professionals.
 - d. Smaller companies may benefit from hiring occasional technical support.

Most of the electricity in the United States is produced in steam turbines. There are many *discrete* steps in this process. In a steam turbine,

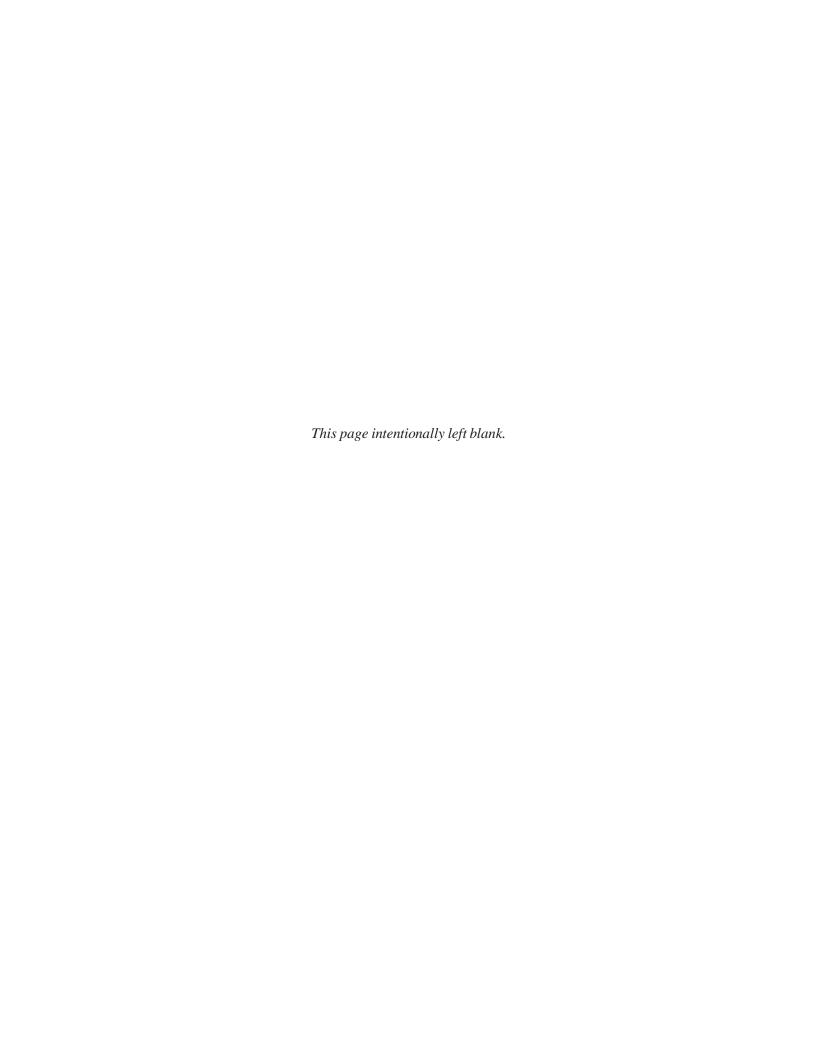

40 Science

combustion of coal, petroleum, or natural gas heats water to make steam. The steam *rotates* a shaft that is connected to a generator that produces electricity. Finally, that electricity is converted by a <u>transformer</u> and *conveyed* from the turbine to its place of use. Many *sources* can provide energy to heat the water in a steam turbine. Coal is primary, producing 51 percent of the country's electricity. Another common way to heat water for steam turbines is through *nuclear* power. In nuclear fission, atoms of uranium fuel are hit by neutrons, *triggering* a continuous chain of fission that releases heat. In 2001, nuclear power generated 21 percent of the electricity in the United States. *Solar* power produces less than 1 percent

Bonus Structure— In this context, still means "even so; despite this." of the United States' electricity needs, because it is not regularly available and harnessing it is more expensive than using fossil fuels. Dependence on electricity *permeates* daily life in the United States. **Still,** few people are aware of the many *components* of electricity production.

- 1. What does the author say about solar power?
 - a. It produces more electricity than any other source.
 - b. It is a relatively small source of energy for heating water in steam turbines.
 - c. Electricity producers are trying to use it more regularly.
 - d. Researchers are trying to make it cheaper to use.

TOEFL Success Read the passage to review the vocabulary you have learned. Answer the question that follows.

Like other functions of the human mind, perception and memory are imperfect. When we tell a story about something that we witnessed, we may *intuitively* believe that our recollection is accurate. However, several factors bias our memories of events. To study this *anomaly*, let us look at the three steps of memory creation: *acquisition* of memory, storing of memory, and *retrieval*. At every stage of memory formation, distortion can occur. At the first stage, acquisition of memory, events are perceived and bits of information are prepared for storage in the brain. However, it is impossible for us to remember every single thing we observe. Through processes that are both *conscious* and unconscious, people determine which details they will focus on.

In its second stage, storage, memories can become further distorted. Over time, our memories *degrade*, as we forget portions of events. To compensate, we may even creatively fill in the *gap* created by the *recession* of long-term memory. Additionally, an individual's memory can be altered during the storage stage by *intervening* occurrences, which can

Bonus Structure— In sum means "to summarize; to give a short version of what has been stated." be subconsciously combined with previously stored memories. Last but not least, we search our memory to locate information. During recall, emotion also seems to play a part in memory distortion. **In sum,** our memories may not be the *indisputable* source of information that we would like them to be.

An introductory sentence for a brief summary of the passage is provided below. Complete the summary by selecting the three answer choices that express the most important ideas in the passage. In each blank, write the letter of one of your choices.

Memory provides an imperfect record of events.

In Russia, several religions coexist, including Christianity, Judaism, Islam, and animism. The most common religion is Christianity, and most Christians are members of the Russian Orthodox Church. The Church has existed for over 1,000 years, surviving even the official atheism of the Soviet era and the agnosticism that may have been even more prominent at the time. During the communist years, many Russians who practiced Orthodoxy sacrificed career and educational opportunities. The tenacity of Russian Orthodoxy may explain why even nonreligious Russians are inclined to call themselves Russian Orthodox. That same staying power drives the Church today, which is run by Aleksey II of Moscow. Born Aleksey Mikhailovich Ridiger, the future patriarch was from a very pious family. Some say that sailors are a superstitious group. Long nights of watching stars predispose them to a belief in astrology. Long periods of isolation lead them to believe in psychic phenomena that others would laugh at. This may explain sailors' frequent reports of seeing phantom ships. From the Gulf of Mexico, across the Atlantic, and to the South China Sea, sailors often claim that such vessels haunt the seas. One of the most famous stories of ghost ships is the Flying Dutchman, which sailed in from Amsterdam to Dutch East India under Hendrick Vanderdecken. When the captain ignored the danger warnings of a storm, his ship was smashed and the crew was lost. According to legend, his arrogance invoked the wrath of God, who condemned the lost crewmembers to battle the waters off the Cape of Good Hope for eternity. Since then, there have been repeated sightings of the Flying Dutchman, one as recent as 1939. Many sightings of phantom ships occur in areas where vessels are known to have sunk. Sailors can never divine when or where they will next encounter a phantom ship. Rather, most of their sightings occur randomly, only later to bring forth information of a former sea horror. Some say that ghosts aboard a phantom ship are trying to use living sailors as their intermediaries. Still others think that the existence of phantom ships is merely a self-perpetuating myth for bored sailors who are prone to too much idle *meditation* about the meaning of life and death on the high seas.

- 1. How would the author explain phantom ships?
 - a. Their appearance is tied to the stars.
 - b. Sailors at sea have little to do.
 - c. Fog and high waves can distort one's vision.
 - d. Shipwreck remains haunt oceans around the world.
- 2. Why does the author mention the Flying Dutchman?
 - a. as the basis of primitive navigation systems
 - b. as an example of a commonly sighted phantom ship
 - c. as the reason why many sailors have mental problems
 - d. as an explanation for sightings of phantom ships

Nelson Mandela devoted his life to fighting *prejudice* in South Africa. Mandela traveled his state, organizing a fight against *discriminatory* laws and racial *bias*. He encouraged civil disobedience as a tool against the *oppression* of Blacks. As deputy president of the African National Congress, Mandela encouraged his fellow citizens to challenge the prevailing *paradigm* of power. Mandela believed that prejudice *burdened* not only the oppressed, but also the oppressors.

The government *countered* Mandela's activities with a criminal conviction. Still, Mandela's *de facto* leadership gained him respect and

authority among his fellow citizens. Mandela's courage and popularity worried **the ruling class,** who did not want to share power. What's more, they refused to <u>amend</u> the state's laws. So when Mandela returned from an overseas trip to gain support for his cause in 1962, he was arrested, jailed, and sentenced to life in prison for various crimes.

Bonus Structure— The ruling class means those who held power mostly because of the families they were born into.

This only fueled Mandela's *notions* about inequality *born into*. and justice. He took his demands to jail, where he demanded the same dress and safety gear for Black prisoners as for White prisoners. After 28 years in prison, Mandela was released, returning immediately to public life. In 1994, he was elected the president of South Africa.

Revisionist history promotes a new view of *chronological* events, usually for political purposes. Radical revisionists *diminish* the credibility of a previous view and may even *deny* that certain events happened at all. Some revisionist Asian historians have ignored long-standing conflicts among native peoples and have explained Asia's conflicts as a

consequence of colonialism and its class-oriented cultural milieu. Good motives among the revisionists—to promote reconciliation among traditional rivals—don't excuse bad history. History is valuable only if its stories coincide with verifiable facts. From far away, an observer may see clearly that a given conflict had nothing to do with colonialism and a lot to do with 1,000-year-old rivalries. But this is not likely to matter much to a confirmed revisionist historian. At its core, revisionism—by the government in particular—is an Orwellian exercise in thought control, not honest science.

Bonus Structure—Good motives don't excuse bad history. Even though revisionists are trying to achieve a good social goal, they shouldn't distort history to do so.

- 1. Which sentence best expresses the essential information of this passage?
 - a. Historians constantly revise history in the light of new facts.
 - Revisionist history is less concerned with accuracy than with promoting a point of view.
 - c. A new way of studying history, revisionism, has been very successful in Asia.
 - d. Revisionist history is the only way to accurately relate events.
- 2. Why does the author of this reading mention Asia?
 - a. because it offers an example of attempts at revisionist history
 - b. because a civil war occurred between revisionists and others
 - c. because it is the birthplace of revisionist history

In the history of U.S. presidential *elections*, the year 1876 stands out as one of the oddest. That year, *polls* suggested that one person had won the popular vote but another had won more official electoral votes—just as happened in the year 2000. In 1876, however, the election was so *bitterly contested* that a special electoral commission was given the *authority* to determine which *candidate*—Republican Rutherford B. Hayes or Democrat Samuel J. Tilden—had won. This commission represented a *coalition* of interests. The Democrats favored this because otherwise the head of the Senate, Republican Thomas Ferry, would probably have been allowed to declare the winner. In the end, the Democrats were disappointed, as the commission *advocated* the Republican cause. The

One of the most controversial murder cases of the twentieth century was that involving the death of Marilyn Sheppard in 1954. Her husband, Dr. Sam Sheppard, was *accused* of killing her and then injuring himself. An unlikely *suspect*, Sheppard was highly respected by his *peers* in the medical world. Still, there were odd aspects to the murder that Sheppard could not explain away. Unfortunately for Sheppard, none of his supporters actually *witnessed* the crime, so nobody could back up Sheppard's claim that the real killer was a bushy-haired man whom Sheppard had chased across his lawn and fought with briefly.

Sheppard was eventually *convicted* of the *offense*, **but** many people **doubt**ed the *verdict*. With aggressive help from a lawyer named F. Lee Bailey, Sheppard got a new trial. Bailey suggested many alternatives to Sheppard's guilt, enough that the new jury could not say he was *guilty* beyond a reasonable doubt. Sheppard was released from prison but died soon afterward. His son, Chip, pursued the

The Fourth Amendment to the U.S. Constitution protects citizens from unreasonable search and seizure. Some civil libertarians have condemned the federal antidrug bureaucracy for threatening this basic right. In a drug case, police need no evidence to intrude on private property, apprehend a suspected dealer, and seize all the person's property. Property taken under this law may be sold for a profit later by the law-enforcement officials involved in the raid. The target of a raid might be implicated only by an unreliable report from an unfriendly neighbor. The police are not required to ascertain whether

Bonus Structure— This refers to the whole situation described in the previous sentence, not to any one noun phrase. In 1979, two British farmers reported that, while sitting on a hill, they suddenly saw the crops below flattened in a perfect circle. They *inferred* that some great force must have come down directly from above to squash the corn and barley. **This** started a public hysteria about so-called crop circles. The patterns pressed into the crops (not all of them

were circles) seemed to have no entry or exit points. Many people hypothesized that only alien spaceships could make such bizarre imprints. Others, including Britain's police, assailed such wild conclusions. They had a contrary theory: Someone was playing a big hoax. Teams of investigators took samples of the plants and the soil, trying to objectively analyze the crop circles as if they were a crime scene. Public curiosity often impaired the investigators, who had to tolerate busloads of tourists flocking to the circles. The farmers in the area, long suspicious of the police, approached the case as an instance of police versus the people. If the local farmers knew the circles were a hoax, they wouldn't say so.

- 1. According to the article, why did many people think that crop circles were created by alien spaceships?
 - a. The circles looked like they had been made from above and had no way in or out.
 - b. The observers in 1979 reported seeing a UFO land and make a crop circle.
 - c. The plants and soil inside a crop circle contained chemicals not found on Earth.
 - d. They were in unusual shapes and contained alien symbols.
- 2. Why does the author mention "a hoax"?
 - a. because one of the locals admitted playing a trick on his neighbors
 - b. because most people think that crop circles are evil
 - c. because police investigators thought crop circles were made by humans as a joke
 - d. because crop circles are probably made by secret government aircraft

The Spanish explorer Pizarro's *abduction* of the Inca King Atahualpa came in 1529. His men *detained* the king, *coerced* the Incas into paying a large ransom in gold and silver, and then *intentionally* killed the king anyway. Their conquest of Peru established the legendary Spanish Main—Spanish holdings on the mainland of Central and South America. The *predicament* for Spain's kings was how to get the riches of the New World to Spain. Pirates and privateers ruled the waves. To *distort* what was actually just robbery, the king of England issued "letters of marque," licenses that turned certain pirates into agents of the British government. Their *piracy* against Spanish ships and Spanish gold was considered service to the king or queen of England.

Most pirates with such letters were social *deviants* anyway, and **predictably**, they became embarrassments to the British crown. In 1603, Britain's King James I canceled all his government's letters of marque. The many dangerous, unemployed pirates became buccaneers, a terrifying mix of tough characters that operated from the

The nature of the family varies widely from culture to culture. In some societies, family members tend to stay in close *proximity* to their *kin*, never moving more than a few miles away from the *ancestral* home. In other places, while the members of one generation may all live near one another, their *descendants* in the next generation scatter widely. In such a case, it's difficult to maintain the same family *cohesion* enjoyed by those who live close together. Sometimes marriage can govern family structure; for example, there may be strict traditions requiring a new bride to leave her *paternal* home and *siblings* to move in with her new husband's family. Such traditions are followed, even by young couples who don't like them, because going against them is likely to result in the loss of *inheritance*. Whatever one's own *sentiments* about family structure, it is important to recognize that one culture's family system is as *legitimate* as another's.

- 1. Which of the following best states the main idea of this passage?
 - a. Different family systems can be found worldwide, but each one deserves respect.
 - Societies in which children move far away from their parents are not very cohesive.
 - c. Although some societies still require a wife to move in with her husband's family, this tradition is dying out.
 - d. The most important factor in family happiness is close proximity to your relatives.
- 2. According to this reading, which family system is most common?
 - a. Members of a family living in the same community.
 - b. Family members spreading out and living in various cities.
 - c. Young couples living with the man's parents.
 - d. It is impossible to tell from this reading.

TOEFL Success Read the passage to review the vocabulary you have learned. Answer the questions that follow.

You can walk into any high school and spot the *cliques*: the jocks hang out here, the geeks there, the Goths and preppies in their areas. Teenagers feel a strong need to belong to a group, to *associate* with people with whom they share common interests or goals. Since adolescence is often a time when teens feel turmoil in their home lives, they seek *affection* and friendship outside the home. They look for other young people to *bond* with when their parents don't seem to "understand." Teens going through the various crises of adolescence can more easily *confide* in others their own age, with whom they have more *in common*. Teen cliques are by no means *exclusive*; membership can *fluctuate* on an almost daily basis, but the important thing is that group members feel a sense of *solidarity* and are *willing* to stick together.

- 1. According to the reading, why do adolescents search for friendship outside the home?
 - a. They want to be accepted by the jocks and Goths.
 - b. They think their parents don't understand the problems they face.
 - c. They want to be in a different clique every day.
 - d. They want to talk about their parents with other teenagers.
- 2. According to the reading, do teens stay in the same groups all the time?
 - a. Yes, because their parents want them to.
 - b. Yes, because they share common interests.
 - c. No, they may move from group to group quite frequently.
 - d. No, most groups don't accept new members.

Gutenberg gave each letter standard forms, a move that had *connotations* far beyond the printing business. The *inscriptions* on tombstones and roadside mileposts, for example, could now be standardized. The cost of books decreased. Even *illiterate* people benefited indirectly from the *advent* of this invention, as the general level of infor-

mation in society increased. However, Gutenberg's press was of limited use for languages that used picture-like symbols for writing instead of a *phonetic* system. Systems of *symbolic* pictographs, each of which *denotes* a word, require many thousands of characters to be cast into lead type by the printer. Phonetic systems, like the Latin alphabet, use the same few characters, recombined in thousands of ways to make different words.

- 1. According to this reading, how did the invention of the printing press benefit illiterate people?
 - a. It helped them learn to read.
 - b. It raised the level of information in a society.
 - c. It lowered the cost of books.
 - d. It saved them from having to read ambiguous handwriting.
- 2. Why was Gutenberg's press not very practical for languages that use picture-like symbols?
 - a. because character-based languages are made of pictographs
 - b. because phonetic alphabets are clearer
 - c. because there are too many characters to make movable type for each one
 - d. because Gutenberg was European, so he didn't know any characterbased languages

- 3. The outfits worn by firefighters are (vulnerable / cumbersome) and heavy.
- 4. Her necklace was especially (cumbersome / striking) because of the diamonds it contained.
- 5. (Vanity / Bulk) led my grandfather to dye his hair and to dress like someone 40 years younger.

TOEFL Success Read the passage to review the vocabulary you have learned. Answer the questions that follow.

The fashion industry encourages people to spend far too much time and money on clothes. **It's natural for** humans to use clothing as a mark of

Bonus Structure— It's natural for introduces an aspect of fashion that's not bad, but it implies that an "unnatural" aspect will come next. belonging to a group and to try to keep up with style *trends*. The fashion industry exploits this natural desire and turns it into a *capricious*, impractical, and expensive rush from one style to another. For example, in one recent year, fashion did an abrupt about-face. Early in the year, fashionable outfits showed a *minimum* amount of fabric and a maximum amount of skin. By late summer, famous fashion designers were drowning people in *bulky*, *cumbersome* outfits that

looked five sizes too big. *Vanity inhibits* people from looking realistically at *exotic* clothing fads. A *striking* new style catches their eye, they look at the clothes they're wearing, and they are suddenly *vulnerable* to the manipulation of the fashion industry.

- 1. Which word best describes the fashion industry, according to the author?
 - a. striking
 - b. minimum
 - c. capricious
 - d. vulnerable
- 2. What is one reason people buy the latest fashions, according to the author?
 - a. Because they want to feel like they are part of the group.
 - b. Because they enjoy spending money.
 - c. Because the fashion world is bizarre.
 - d. Because their clothes from last year don't fit.
